Display for ALTOSONIC 5

- Configurable display for ALTOSONIC 5
- Easy installation
- Durable design

1.1 Local display for the ALTOSONIC 5

The display is especially designed to be connected to the ALTOSONIC 5.

Information shown on the display can be configured via the Monitoring Configuration and Diagnose tool supplied with the meter. To define the local parameters for communication and backlight settings the front keys can be used.

The UFD 5 is supplied with a mounting bracket for wall mounting or 2” pipe mounting.

1.2 Options

By default, the housing is made from aluminium. For harsh environments, a stainless steel version is available. This stainless steel 316L housing is resistant to extremely salty atmospheres (offshore).
2.1 Technical data table

- The following data is provided for general applications. If you require data that is more relevant to your specific application, please contact us or your local sales office.
- Additional information (certificates, special tools, software,...) and complete product documentation can be downloaded free of charge from the website (Downloadcenter).

**Design**

| Construction | The display for the ALTOSONIC 5 measurement system consists of a housing with LCD display. High intensity transflective numeric and alphanumeric LCD, UV-resistant. With bi-color backlight. |
| Features | Speedometer with black indicators around edge divided 20 blocks over 100%. Shows up to 5 parameters, configurable via Monitoring Configuration and Diagnostic tool. Three control keys to operate through glass front window. |

**Ambient conditions**

| Ambient temperature | -40...+70°C / -40...+158°F |

**Materials**

| Body material | Standard: copper free aluminum Optional: Stainless steel AISI 316 L |

**Electrical connections**

| Power supply | 10...30 VDC (galvanically isolated) |
| Output | Modbus RS485 (galvanically isolated) |
| Cable entries | 1x NPT 1/2“ + 1x M20x1,5 |

**Approvals and certificates**

**CE**

This device fulfills the statutory requirements of the EC directives. The manufacturer certifies successful testing of the product by applying the CE mark.

**Electromagnetic compatibility**

**Hazardous areas**

ATEX EEx II 2G EEx d IIC T6 Gb IECEx Ex d IIC T6 Gb

FM (pending) Class I, Div. 1 & 2, Groups B, C & D Class II, Div. 1, Groups E, F & G and Div. 2, Groups F & G Class III, Div. 1 & 2

**Other approvals and standards**

Ingress protection IP67 or NEMA Type 4X / 7 / 8 / 9

3.1 Intended use

Responsibility for the use of the measuring devices with regard to suitability, intended use and corrosion resistance of the used materials against the measured fluid lies solely with the operator.

The manufacturer is not liable for any damage resulting from improper use or use for other than the intended purpose.

This is a display that can optionally be used with the ALTOSONIC 5 flowmeter to have the flow rate available locally.

The UFD 5 optional display forms an integral part of the flowmeter. The display can be configured with the Monitoring configuration and diagnostic software tool which is supplied with the meter and can be downloaded from the KROHNE website. The configuration is described in the ALTOSONIC 5 manual.
4.1 Cable entries

KROHNE product overview

- Electromagnetic flowmeters
- Variable area flowmeters
- Ultrasonic flowmeters
- Mass flowmeters
- Vortex flowmeters
- Flow controllers
- Level meters
- Temperature assemblies
- Pressure transmitters
- Analysis products
- Products and systems for the oil & gas industry
- Measuring systems for the marine industry
