KROHNE Messtechnik
with its head office in Duisburg, Germany, develops, manufactures and delivers products in the field of flow, level, temperature, analysis and pressure measurement.
KROHNE Academy online gives you direct access to the knowledge and vast experience of one of the leading suppliers in industrial process measurement.
Our Academy is dedicated to people involved in process measurement that come into contact with different measurement principles on a daily basis, as well as to students or to interested parties who wish to bring their knowledge of measurement techniques and applications in technical installations up-to-date.
For our Web Based Training no special knowledge is required, but it is useful to have a technical understanding.

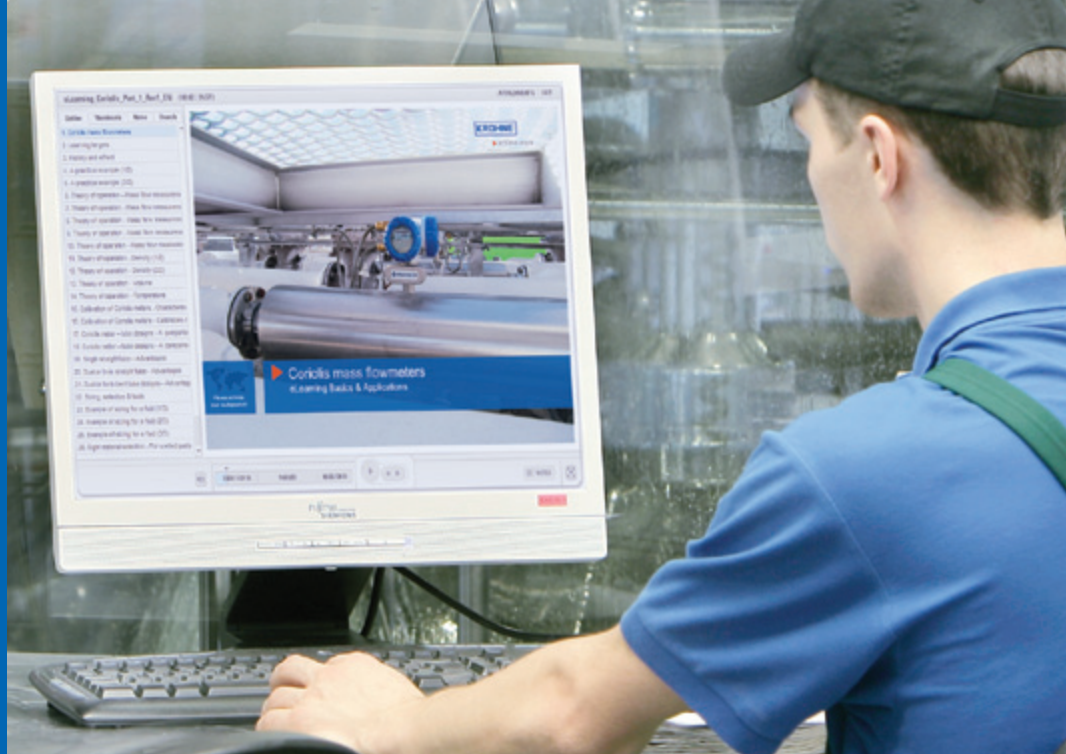

▶ How can you benefit from the KROHNE Academy online ?

- Independent product and commercial-free learning material in regard to measuring technology in the process industry
- A clear structure to the learning units: measurement principles, sizing, advantages and limits of operation, applications and industries
- Discussion and interaction with our experts on specific issues

▶ What are the main benefits of the online platform?

- Free and unlimited use of the platform and of all available courses
- Learning material available in up to 4 languages: DE, EN, FR, CN
- Independent of time and place
- Repetition of courses
- Decision of own learning speed
- Current learning progress and attainment of a certificate

▶ Where can you find our Web Based Training?

Our Web Based Training is available on our online learning platform ILIAS. Here, you can find different learning content in several languages. Should you have any questions, you can contact us at any time.
