

KROHNE is a world-leading manufacturer and supplier of solutions in industrial process instrumentation. KROHNE offers supporting products and services for one-stop-shopping and in industries as widespread as oil & gas, water & wastewater, chemical & petrochemical, food & beverage, power, minerals & mining and marine.

The level of expertise in the field of process measurement is unique, both in the standard applications and in customer specific customization. KROHNE has 17 production sites in 12 countries and its own sales organization and exclusive agencies in more than 66 countries.

Continuous Improvement Engineer

This is what we offer you:

Starting off with a competitive salary depending on your education and experience, we can safely say that we offer a job with lots of responsibility and plenty of opportunities to develop yourself. We also offer you:

- 1 year contract;
- Well arranged pension at PMT;
- Travel expenses reimbursed;
- 8% holiday pay, 25 days off and 3 collective days off;
- Gratuity bonus;
- Budget for training or educational purposes;
- Access to the KROHNE Online Academy;
- Fitnesspolicy.

This is what you can do for us:

We are looking for a CI engineer that will organize, coordinate and manage the sustainability of manufacturing improvements. For instance you will design and implement with the people on the floor simple problem solving tools or other LEAN tools but also lead and facilitate production improvements to increase productivity of existing lines by changing the working method, the layout or eliminating process waste. You will also be:

- installing customized tools
- leading implementation of improvements in the full PDCA cycle
- training and instructing production staff
- developing and maintaining customized LEAN solutions for the shopfloor
- introducing and sustaining LEAN tools in a production environment
- organizing, leading and following up of Kaizen-events

These are the job requirements:

We are looking for an analytical and proactive colleague with technical expertise, organization skills and leadership skills. Someone who is able to contribute in short-long term strategy development, is able to adapt theory into practice and has a hands-on mentality. You will also need:

- HBO/Bachelor regarding process engineering, quality engineering or industrial engineering
- Minimum of 5 years of relevant experience
- Pro in Six Sigma, LEAN and Agile. Black belt certification is highly preferred
- Experience as a change manager
- Excellent communication skills in English and Dutch
